Honorable Richard Helms
Director
Central Intelligence Agency
Washington, D. C. 20505

Dear Mr. Helms:

The enclosed draft report is the product of proposed revisions resulting from a recent study conducted by the Committee's staff. The study was initiated for the purpose of revising the biennial inventory report's format in such a manner as to accomplish the reporting of all pertinent Federal property data in an informative style.

The following major revisions are included in this preliminary report:

- (1) A section listing Federally-owned realty by State, agency and bureau, has been added. This detailed breakdown contains the cost and acreage of Federally-owned property in the fifty States and the District of Columbia. Included in these tables are estimated present-day values for public domain and "no value" acreage.
- (2) Our previous practice of reporting estimated present-day values for public domain and "no value" acreage separately has been terminated. These amounts are now included in the States' breakdown.
- (3) A new part concerning realty leased by the Federal Government has been added.

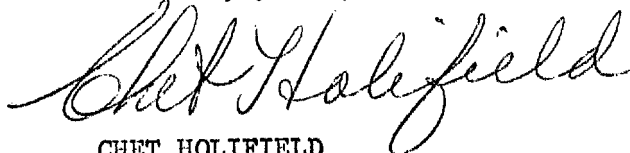

-2-

- (4) The Committee has made greater use of maps and charts to graphically report the extent of Federal ownership of real and personal property.
- (5) Although not reported in this draft, the Committee plans to include in future reports a section on federally owned property in the custody of contractors.

A limited number of these draft reports have been published for the purpose of soliciting readers' comments. The Committee by considering these suggestions can evaluate what future revisions, if any, are necessary. In order that these revisions may be reflected in our Federal Property Inventory Report as of June 30, 1972, it is requested that all comments be furnished to the Committee by January 1, 1972.

Thank you for your cooperation in this endeavor.

Sincerely yours,
